New Britain, CT*

Victory Energy Solutions became an approved vendor for the Connecticut Energy Efficiency Fund's Home Energy Solutions (HES) program in August of 2009. They were selected based on their strong qualifications and quality response to a formal Request for Qualifications. I, as the CL&P Program Administrator for the program am very pleased Victory is on the HES team. They are very customer centric and have outstanding inspection ratings on their work performed and professionalism. Further, our program has intense reporting requirements and Victory quickly adapted to it and has had no problems with timely deadlines.

Doing the job of energy efficiency retrofits for customers is strength for Victory, but much can also be said about the responsiveness, knowledge and accuracy of office personnel it really rounds out a solid company.
